CONTENTS OF VOLUME 59

NUMBER 1—JANUARY

PAGE

Guest Editorial 1

Interdisciplinary interactions and dynamic systems integration. D. T. McRuer 3

Eigenstructure assignment. K. M. Sobel, E. Y. Shapiro and A. N. Andry, Jr 13

Quantitative feedback theory technique and applications. C. H. Houpis, R. R. Sating, S. Rasmussen and S. Sheldon 39

Dynamic inversion: an evolving methodology for flight control design. D. Enns, D. Bugajski, R. Hendrick and G. Stein 71

Practical control law design for aircraft using multivariable techniques. J. D. Blight, R. L. Dailey and D. Gangsaas 93

Fly-by-wire for commercial aircraft: the airbus experience. C. Favre 139

Lavi flight control system. M. Shmul, E. Erenthal and M. Attar 159

Development and flight experience of the control laws in the Experimental Aircraft Programme. A. McCuish 183

X-29 flight control system: lessons learned. R. Clarke, J. J. Burken, J. T. Bosworth and J. E. Bauer 199

The control system design methodology of the STOL and Manoeuvre Technology Demonstrator. D. J. Moorhouse and K. D. Citurs 221

A high bandwidth control system for a helicopter in-flight simulator. W. von Grünhagen, G. Bouwer, H.-J. Pausder, F. Henschel and J. Kaletka 239

Advanced flight control technology achievements at Boeing Helicopters. K. H. Landis, J. M. Davis, C. Dabundo and J. F. Keller 263

Flight control and handling research with the VAAC Harrier aircraft. G. T. Shanks, C. Fielding, S. J. Andrews and R. A. Hyde 291

Application of nonlinear inverse methods to the control of powered-lift aircraft over the low-speed flight envelope. J. A. Franklin 321

NUMBER 2—FEBRUARY

An efficient linear method for ARMA spectral estimation. R. L. Moses, V. Šimonytė, P. Stoica and T. Söderström 337

State-space solutions to Hadamard weighted $\mathcal{H}_\infty$ and $\mathcal{H}_2$ control problems. F. van Diggelen and K. Glover 357

Design of reconfigurable control systems using eigenstructure assignments. Jin Jiang 395

PAGE

Optimal controller design for discrete saturating systems. FENG-HSIAG HSIAO 411

A nonlinear H_∞ control design in robotic systems under parameter perturbation and external disturbance. BOR-SEN CHEN, TZANN-SHIN LEE and JUI-HSUAN FENG 439

Existence of positive-definite and semidefinite solutions of discrete-time algebraic Riccati equations. H. K. WIMMER 463

Mapping circular bounds on frequency responses to bounds on time responses. M. MIRSHAFII and J. M. EDMUNDS 473

Simultaneous robust stabilization of two plants having unstructured uncertainty. SANMIN WANG and F. W. FAIRMAN 485

Parametric subsystem set estimation for interconnected systems. MAN-FUNG CHEUNG and S. YURKOVICH 499

Observer design for a class of nonlinear systems. S. RAGHAVAN and J. K. HEDRICK 515

On some structures of stabilizing control laws for linear and time-invariant systems with bounded point delays and unmeasurable states. M. DE LA SEN 529

Actuator saturation compensation for self-tuning controllers. C. W. CHAN and K. HUI 543

Controller design for maximizing the size of a step disturbance in non-minimum phase, unstable uncertain systems. M. SOBHANI and S. JAYASURIYA 561

A simple criterion for global stabilizability of a class of nonlinear singularly perturbed systems. CHUNG-CHENG CHEN and JER-GUANG HSIEH 583

NUMBER 3—MARCH

Guest Editorial 593

Nonlinear auto-tune identification. W. L. LUYBEN and E. ESKINAT 595

Representation of uncertain time delays in the H_∞ framework. ZI-QIN WANG, P. LUNDSTRÖM and S. SKOGESTAD 627

An optimization approach to robust nonlinear control design. B. JAYARAMAN and B. R. HOLT 639

μ-Suboptimal design of a robustly performing controller for a chemical reactor. N. AMANN and F. ALLGÖWER 665

Design of adaptive linearizing controllers for non-isothermal reactors. D. DOCHAIN 689

On-line modelling and predictive control of an industrial terpolymerization reactor. B. A. OGUNNAIKE 711

Multirate multivariable model predictive control and its application to a polymerization reactor. MASAHIRO OHSHIMA, IORI HASHIMOTO, HIROMU OHNO, MAKOTO TAKEDA, TAKASHI YONEYAMA and FUMIO GOTOH 731

PAGE

Applications of multivariate statistical methods to process monitoring and controller design. M. J. PIOVOSO and K. A. KOSANOVICH 743
Neural network decomposition strategies for large-scale fault diagnosis. S. N. KAVURI and V. VENKATASUBRAMANIAN 767
Model-predictive control of a combined sewer system. M. S. GELORMINO and N. L. RICKER 793
Advanced controller design for a distillation column. O. E. AGAMENNONI, J. L. FIGUEROA, G. W. BARTON and J. A. ROMAGNOLI 817
Multivariable constrained predictive control (with application to high performance distillation). D. J. WILKINSON, A. J. MORRIS and M. T. THAM 841
Real-time design of an adaptive nonlinear predictive controller. T. PRÖLL and M. N. KARIM 863

NUMBER 4—APRIL

Editorial 891
Fighter aircraft lateral directional axes fuil envelope control law design. A. SPARKS, J. BUFFINGTON and S. BANDA 893
Stability of linear feedback systems with random communication delays. R. KRTOLICA, Ü. ÖZGÜNER, H. CHAN, H. GÖKTAŞ, J. WINKELMAN and M. LIUBAKKA 925
Enhancement of robustness in observer-based fault detection. P. M. FRANK 955
Convergence of the time-invariant Riccati differential equation and LQ-problem: mechanisms of attraction. F. M. CALLIER, J. WINKIN and J. L. WILLEMS 983
Equivalence transformations of rational matrices and applications. N. P. KARAMPETAKIS, A. C. PUGH and A. I. VARDULAKIS 1001
Necessary and sufficient conditions for stability of time-varying discrete interval matrices. HYUNG SEOK HAN and JANG GYU LEE 1021
A new parametrization of H_∞ suboptimal controllers. P. GAHINET 1031
Stable zeros of a discrete system obtained by sampling a continuous-time plant with a time delay. MITSUAKI ISHITOBI 1053
Input design for detection of abrupt changes in dynamical systems. F. KERESTECİOĞLU and M. B. ZARROP 1063
Some results in nonlinear output regulation and feedback stabilization. XIAOMING HU 1085
On the simultaneous stabilization of three plants. SANMIN WANG and F. W. FAIRMAN 1095
Optimization of control input for deadbeat control systems. YAO ZHAO and HIDENORI KIMURA 1107
Output response tuning of one- and two-degree-of-freedom controllers using an H_∞ approach. J. M. EDMUNDS 1119

PAGE

NUMBER 5—MAY

Simultaneous structure identification and parameter estimation of multivariable systems. SHAOHUA NIU and D. G. FISHER 1127
Robust strict positive real stabilization and asymptotic hyperstability robustness. YINGMIN JIA, WEIBING GAO and MIAN CHENG 1143
Generation of discrete and continuous time transfer function coefficients. D. P. STOTEN and A. J. L. HARRISON 1159
Bi-causal eigenvector sequences and the design of causal commutative controllers. B. KOUVARITAKIS and J. C. BASILIO 1173
Properties of optimally robust controllers. J. A. SEFTON and R. J. OBER 1191
On the development of discontinuous observers. C. EDWARDS and S. K. SPURGEON 1211
Identification of linear systems with noisy input using input–output cumulants. YUJIRO INOUYE and YASUYUKI SUGA 1231
On the control of regularly ε-perturbed nonlinear systems. J. P. BARBOT, N. PANTALOS, S. MONACO and D. NORMAND-CYROT 1255
Almost sure and δ-moment stability of jump linear systems. YUGUANG FANG, K. A. LOPARO and XIANGBO FENG 1281
Robust end point tracking control of a two-degree-of-freedom mass–spring–damper system. M. M. BRIDGES, J. Y. ZHU, D. M. DAWSON and Z. QU 1309
Simultaneous decoupling and disturbance rejection—a structural approach. J. M. DION, C. COMMAULT and J. MONTOYA 1325
Asymptotic stability of controlling uncertain dynamical systems. ZHIHUA QU 1345

NUMBER 6—JUNE

Experimental verification of a delay compensation algorithm for integrated communication and control systems. R. LUCK and A. RAY 1357
Observer-based schemes for adaptive nonlinear state-feedback control. M. KRSTIĆ and P. V. KOKOTOVIĆ 1373
Singular (J, J')-lossless factorization for strictly proper functions. XIN XIN and HIDENORI KIMURA 1383
Transient stability analysis of power systems via aggregation on subsets. H. SHAABAN and LJ. T. GRUJIĆ 1401
The calculation of real-μ and controller design. J.-L. LIN, I. POSTLETHWAITE and D.-W. GU 1421
A structure detection algorithm for nonlinear dynamic rational models. S. A. BILLINGS and Q. M. ZHU 1439
Adaptive model-following controller for robotic manipulators. M. S. MAHMOUD and A. A. BAHNASAWI 1465
Control of mean time between failures. A. HANSSON 1485

PAGE

Derivation of a 'designer's guide' for interactive 'grey-box' identification of nonlinear stochastic objects. T. BOHLIN 1505

Stabilization of uncertain dynamic delay systems by memoryless feedback controllers. H. TRINH and M. ALDEEN 1525

Realization of simple adaptive control by using parallel feedforward compensator. Z. IWAI and I. MIZUMOTO 1543

Minimal energy covariance control. R. E. SKELTON, JI-HAN XU and KAZUNORI YASUDA 1567

Feedback stabilization of neutral systems via the transformation technique. Y. A. FIAGBEDZI 1579

Subject Index 1591
